

Title 33

ENVIRONMENTAL QUALITY

Part IX. Water Quality

Subpart 2. The Louisiana Pollutant Discharge Elimination System (LPDES) Program

Chapter 25. Permit Application and Special LPDES Program Requirements

§2511. Storm Water Discharges

A. – A.1.e.iv. ...

2. The state administrative authority may not require a permit for discharges of storm water runoff from the following:

a. ~~mining operations or oil and gas exploration, production, processing or treatment operations or transmission facilities, composed entirely of flows that which are from conveyances or systems of conveyances (including but not limited to pipes, conduits, ditches, and channels) used for collecting and conveying precipitation runoff and that which are not contaminated by contact with, or that have has not come into contact with, any overburden, raw material, intermediate products, finished product, byproduct, or waste products located on the site of such operations, except in accordance with Subparagraph C.1.d of this Section;~~ and

b. all field activities or operations associated with oil and gas exploration, production, processing, or treatment operations or transmission facilities, including activities necessary to prepare a site for drilling and for the movement and placement of drilling equipment, whether or not such field activities or operations may be considered to be construction activities, except in accordance with Subparagraph C.1.c of this Section. Discharges of sediment from construction activities associated with oil and gas exploration, production, processing, or treatment operations or transmission facilities are not subject to the provisions of Clause C.1.c.iii of this Section.

[Note to Subparagraph A.2.b: The department encourages operators of oil and gas field activities or operations to implement and maintain Best Management Practices (BMPs) to minimize discharges of pollutants, including sediment, in storm water both during and after construction activities to help ensure protection of surface water quality during storm events. Appropriate controls would be those suitable to the site conditions and consistent with generally accepted engineering design criteria and manufacturer specifications. Selection of BMPs could also be affected by seasonal or climate conditions.]

A.3. – E.7.c. ...

8. ~~Any storm water discharge associated with small construction activities identified in Subparagraph B.15.a of this Section, other than discharges associated with small construction activity at oil and gas exploration, production, process, and treatment operations or transmission facilities, requires permit authorization by March 10, 2003, unless designated for coverage before then. Discharges associated with small construction activity at such oil and gas sites require permit authorization by June 12, 2006.~~

E.9. – G.4.d, certification. ...

AUTHORITY NOTE: Promulgated in accordance with R.S. 30:2001 et seq., and in particular Section 2074(B)(3) and (B)(4).
